1. Add these two numbers together:

   Ten thousand and thirty four
   Three thousand nine hundred and sixty eight

Answer: .....

2.

```
  7004
- 358
------
------
```

---

3. Multiply 34 by 17.

Answer: .....

---

4. Divide 1908 by 6.

Answer: .....

---

5. If two numbers multiply to give 36 and their sum is 15, what are the two numbers?

Answer: .....

6. What is $\frac{2}{7}$ of 315?

Answer: .....

---

7. Put the following numbers in order of size, starting with the smallest first:

$3\frac{1}{4}$ 3·34 $3\frac{3}{4}$ 3·025

Answer: .....

---

8. What is the difference, in cm, between 3.2 metres and 30 cm?

Answer: .....

---

9. Put the correct number in the empty box.

$\square - 8 = 4 \times 3$

---

10. Write down the next two numbers in the sequence.

5, $6\frac{1}{2}$, 8, $9\frac{1}{2}$, ..., ...

43. **A B C D E** are the first five letters of the alphabet in the usual order.

A and **B** are neighbours as they are next to each other in the alphabet.
B and **C** are also neighbours.
C and **D** are neighbours, **D** and **E** are neighbours.

The five letters have to be written down in some other order so that **no** neighbours are next to each other (in any order).
For example, **A C E D B** is **not allowed** because the neighbours **D** and **E** are next to each other.

a) If we start with **A** there are only two ways of writing the five letters with no neighbours next to each other. The first one is done for you. Complete the other way.

Answer 1: **A** **C** **E** **B** **D**

Answer 2: **A** **D** ___ ___ ___

b) Now start with the letter **B**. There are three ways of writing the five letters with no neighbours next to each other. The first one is done for you. Complete the other two ways.

Answer 1: **B** **D** **A** **C** **E**

Answer 2: **B** **D** ___ ___ ___

Answer 3: **B** **E** ___ ___ ___

c) In total, how many ways are there of arranging the letters **A B C D E**, so that none are next to their neighbours?

Answer: .....
