

Thursday 15 May 2014 – Morning**GCSE TWENTY FIRST CENTURY SCIENCE
CHEMISTRY A/SCIENCE A****A171/01** Modules C1 C2 C3 (Foundation Tier)

Candidates answer on the Question Paper.
A calculator may be used for this paper.

OCR supplied materials:
None

Other materials required:

- Pencil
- Ruler (cm/mm)

Duration: 1 hour

Candidate forename		Candidate surname	
Centre number			
		Candidate number	

INSTRUCTIONS TO CANDIDATES

- Write your name, centre number and candidate number in the boxes above. Please write clearly and in capital letters.
- Use black ink. HB pencil may be used for graphs and diagrams only.
- Answer **all** the questions.
- Read each question carefully. Make sure you know what you have to do before starting your answer.
- Write your answer to each question in the space provided. Additional paper may be used if necessary but you must clearly show your candidate number, centre number and question number(s).
- Do **not** write in the bar codes.

INFORMATION FOR CANDIDATES

- The quality of written communication is assessed in questions marked with a pencil (.
- The Periodic Table is printed on the back page.
- The number of marks is given in brackets [] at the end of each question or part question.
- The total number of marks for this paper is **60**.
- This document consists of **24** pages. Any blank pages are indicated.

Answer **all** the questions.

- 1 This question is about fuels that burn in car engines.

These fuels are hydrocarbons.

- (a) (i) Hydrocarbons burn in plenty of air to make two products.

One product is carbon dioxide.

What is the **other** product?

Put a ring around the correct answer.

chlorine

nitrogen

oxygen

water

[1]

- (ii) Which diagram shows a molecule of carbon dioxide, CO_2 ?

Put a ring around the correct answer.

[1]

Only buses can drive in bus lanes.

Buses and cars make carbon dioxide and other pollutants when they burn fuel.

Dom says there will be **less** air pollution as more people will travel by bus.

Kate says there will be **more** air pollution as a bus burns more fuel than a car.

Who is correct and why?

The quality of written communication will be assessed in your answer.

[6]

[6]

[Total: 8]

2 Sulfur dioxide is a pollutant from coal-fired power stations.

(a) Sulfur dioxide is made from two elements.

Name these elements and say where they come from in a coal-fired power station.

.....

.....

.....

..... [2]

(b) The graph shows the amount of sulfur dioxide put into the air from 1990 to 2010.

Write **three** things that this graph shows about the amount of sulfur dioxide put into the air.

.....

.....

.....

.....

..... [3]

- (c) (i) Jake is a scientist.

Jake says, "Sulfur dioxide pollution has decreased as coal-fired power stations have shut down."

This statement is an example of

a correlation

an estimation

an evaluation

a prediction

Put a ring around the correct answer.

[1]

- (ii) Shutting down coal-fired power stations is one way to lower the amount of sulfur dioxide put into the air.

Describe and explain **another** way.

.....

.....

.....

..... [2]

[Total: 8]

- 3** Scientists have estimated the percentage of different gases in the atmosphere before plant life on Earth began.

The pie chart shows this estimation.

- (a)** What is the gas **X** that made up most of the atmosphere before there was life on Earth?

Put a **ring** around the correct answer.

argon **carbon dioxide** **nitrogen oxide** **oxygen** **[1]**

- (b)** Explain why the composition of the Earth's atmosphere changed after plant life on Earth began.

.....

.....

.....

..... **[2]**

[Total: 3]

- 4 A supermarket uses plastic carrier bags.

The handles of some of a **new** set of bags break when customers carry their shopping away.

The supermarket complains to the company that makes the bags.

The company tests 5 of the new set of bags.

They find the mass that will break each bag.

Here are their measurements.

Bag number	1	2	3	4	5
Mass to break handle in kg	6.5	8.2	6.1	10.2	9.0

- (a) (i) Use **all** their measurements to find the mean value of the mass to break the handles.

Show your working.

..... kg [2]

- (ii) What is the range of these measurements?

..... to kg [1]

- (iii) Measurements on older bags have the same mean value.

The range for the older bags is 7.4 to 8.6 kg.

Use this information and your answer to part (ii) to suggest why some of the new bags are breaking more easily than the old ones.

.....
 [1]

(b) Carrier bags are made of polythene.

The diagrams show how the molecules are arranged in two types of polythene.

polythene **A**

polythene **B**

(i) Put a tick (✓) in the box next to the correct words to complete the sentence.

The density of polythene A is	higher than		the density of polythene B .
	lower than		
	the same as		

[1]

(ii) Molecules that are **closer** together have **bigger** forces between them.

Put a tick(✓) in the box next to the correct words to complete the sentence.

The breaking strength of polythene A is	higher than		the breaking strength of polythene B .
	lower than		
	the same as		

[1]

[Total: 6]

- 5 An oil refinery separates crude oil into different fractions.

This diagram shows the amount of each fraction made from a barrel of crude oil.

- (a) (i) Here are some statements about the fractions in crude oil.

Use the diagram to find out if the statements are true or false.

Put a tick (✓) in the correct box for each statement.

	true	false
The smallest fraction of crude oil is gas.		
There is more lubricant than petrol.		
The amount of crude oil used to make chemicals is the same as the amount of lubricant.		

[2]

- (ii) Show that more than half of the crude oil is used as fuel oil.

.....

..... [2]

(b) Complete the sentences to explain why gas boils at a lower temperature than fuel oil.

Put a tick (✓) in the box next to the correct words to complete the sentences.

Gas molecules are	smaller than		molecules of fuel oil.
	the same size as		
	larger than		

The forces between gas molecules are	smaller than		the forces between molecules of fuel oil.
	the same size as		
	larger than		

The energy needed to overcome the forces between gas molecules is	less than		the energy needed to overcome the forces between molecules of fuel oil.
	the same as		
	more than

BLANK PAGE

Question 6 begins on page 12
PLEASE DO NOT WRITE ON THIS PAGE

6 (a) Nanoparticles are very tiny particles.

Silver nanoparticles are added to some fibres.

A company adds nanoparticles to the fibres that make socks and plasters.

Some people think there is a risk in using nanoparticles at the moment.

Discuss the risks and the benefits of using nanoparticles in socks and plasters.

The quality of written communication will be assessed in your answer.

..... [6

(b) Give **one** other use of nanoparticles and say how nanoparticles improve the properties.

.....

.....

.....

..... [2]

[Total: 8]

7 Some people are talking about the Government's advice on eating salt.

This is what they say.

Dr Abbott
Salt has been used as a preservative for centuries. My company makes foods that use salt in this way. Sickness from food poisoning is much more common than high blood pressure.

Mr Collins
Government scientists set a target to eat less than 6 g per day of salt. I eat 0 g per day because I never put salt on my food.

Miss Brown
A great deal of evidence that eating less salt lowers blood pressure has been published in scientific journals.

Mrs Evans
I look on packet labels and try to keep my salt intake as low as possible.

Professor Derry
I went to a conference where scientists showed evidence that a low sodium diet could be harmful to some people.

(a) (i) Who is talking about information that has been **peer reviewed**?

Put ticks (✓) in the boxes next to the **two** correct answers.

Dr Abbott	
Miss Brown	
Mr Collins	
Professor Derry	
Mrs Evans	

[1]

- (ii) Who is saying that a benefit of salt in food, outweighs a risk from eating too much salt?

Put a tick (✓) in the box next to the correct answer.

Dr Abbott

☐

Miss Brown

☐

Mr Collins

☐

Professor Derry

☐

Mrs Evans

☐

[1]

- (iii) Mr Collins and Mrs Evans have different ways of assessing the amount of salt they eat.

Who is correct and why?

.....

.....

.....

..... [2]

- (iv) Companies add salt to foods to preserve them and for one other reason.

What is that other reason?

..... [1]

- (b) (i) People with high blood pressure can use potassium chloride as a substitute for salt (sodium chloride).

Rocks containing potassium chloride are found deep underground and mined in the same ways as those containing sodium chloride.

Companies make potassium chloride using solution mining.

Suggest reasons why they might use solution mining rather than digging rocks out of the ground.

.....

.....

.....

..... [2]

- (ii) Potassium chloride solution is electrolysed to make different products.

It is similar to the electrolysis of sodium chloride.

Hydrogen, chlorine and one other product are made.

What is the other product?

Put a ring around the correct answer.

**potassium
carbonate**

**potassium
hydroxide**

**potassium
oxide**

**sodium
chloride**

- 8 In remote parts of a developing country, the drinking water causes diseases that kill people.

In one area people started to add chlorine to drinking water from 2009.

A charity raised the money to pay for this.

Look at the graph.

Should chlorine be added to drinking water in other remote areas?

In your answer you should:

- describe what the graph shows you about adding chlorine
- explain why the chlorine has an effect
- write about the advantages and disadvantages of adding chlorine to drinking water in other parts of the developing country.

The quality of written communication will be assessed in your answer.

[Total: 6]

9 This is a question about poly vinyl chloride (PVC).

(a) PVC contains carbon, hydrogen and one other type of atom.

What is the other type of atom?

Put a ring around the correct answer.

chlorine

nitrogen

sodium

sulfur

[1]

(b) PVC is used to make window frames and bags for blood transfusions.

Life Cycle Assessments (LCA) for these two uses are different.

Which **two** statements about LCAs explain this difference?

Put ticks (✓) in the boxes next to the **two** correct answers.

Crude oil is used to make the PVC.

☐

Energy is used to make PVC from crude oil.

☐

There is an environmental impact when PVC is made from crude oil.

☐

There is an environmental impact when each product is made from PVC.

☐

The length of time each product is in use.

☐

[2]

- (c) PVC can be disposed of in landfill or recycled.

The graph shows the amount of PVC recycled in Europe since the year 2000.

- (i) The European target was to recycle 200 000 more tonnes of PVC in 2010 than in 2000.

Was this target reached?

Explain your answer.

.....

.....

.....

..... [2]

- (ii) Suggest **two** advantages of recycling **more** PVC.

.....

.....

.....

..... [2]
