# GCSE COMBINED SCIENCE: TRILOGY

# H

Higher Tier  
Chemistry Paper 2H

Tuesday 11 June 2024

Morning

Time allowed: 1 hour 15 minutes

## Materials

For this paper you must have:

- a ruler
- a scientific calculator
- the periodic table (enclosed).

## Instructions

- Use black ink or black ball-point pen.
- Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer **all** questions in the spaces provided.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.
- In all calculations, show clearly how you work out your answer.

## Information

- The maximum mark for this paper is 70.
- The marks for questions are shown in brackets.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

**0 5**

Sulfuric acid is produced by an industrial process.

In the process, sulfur dioxide (SO<sub>2</sub>) reacts with oxygen (O<sub>2</sub>) to produce sulfur trioxide (SO<sub>3</sub>).

The equation for the reversible reaction is:

The forward reaction releases 198 kJ/mol of energy.

**0 5 . 1**

What is the amount of energy transferred during the reverse reaction?

**[1 mark]**

Tick (✓) **one** box.

< 198 kJ/mol

☐

= 198 kJ/mol

☐

> 198 kJ/mol

☐**0 5 . 2**

The concentration of oxygen is increased.

What is the effect on the position of the equilibrium?

**[1 mark]**

Tick (✓) **one** box.

Equilibrium position shifts to the left

☐

Equilibrium position does not change

☐

Equilibrium position shifts to the right

☐

**0 5 . 3** The pressure is decreased.

What is the effect on the position of the equilibrium?

[1 mark]

Tick (✓) **one** box.

Equilibrium position shifts to the left

☐

Equilibrium position does not change

☐

Equilibrium position shifts to the right

☐

**0 5 . 4** The temperature is increased.

What is the effect on the position of the equilibrium?

[1 mark]

Tick (✓) **one** box.

Equilibrium position shifts to the left

☐

Equilibrium position does not change

☐

Equilibrium position shifts to the right

☐

**0 5 . 5** A catalyst is used in the reaction.

Suggest what effect the catalyst has on the position of the equilibrium.

Give **one** reason for your answer.

---

---

---

---

---

---

---

Rate = \_\_\_\_\_ mol/s

**0 6**

The Earth's natural resources are used to manufacture useful products.

One useful product is potable water.

Potable water can be produced from sea water by distillation.

**0 6 . 1**

Give **one disadvantage** of using distillation to produce potable water.

**[1 mark]**

---

---

**0 6 . 2**

Describe **one** other method to produce potable water from sea water.

**[2 marks]**

---

---

---

---

**Question 6 continues on the next page**

**Turn over ►**

A student investigated the mass of dissolved solids in a  $100\text{ cm}^3$  sample of sea water.

This is the method used.

1. Weigh an evaporating basin.
2. Measure  $100\text{ cm}^3$  of sea water.
3. Pour the sea water into the evaporating basin.
4. Heat the evaporating basin.
5. Weigh the evaporating basin and contents.
6. Calculate the mass of dissolved solids in the sea water.

0 6 . 3

Explain how repeating steps 4 and 5 would improve this method.

[2 marks]

---

---

---

---

0 6 . 4

The total mass of dissolved solids in a  $100\text{ cm}^3$  sample of sea water is 3.50 g.

The percentage of sodium chloride in the dissolved solids is 77.8%.

Calculate the mass of sodium chloride dissolved in the  $100\text{ cm}^3$  sample of sea water.

[2 marks]

---

---

---

Mass of sodium chloride = \_\_\_\_\_ g

Biological methods are used to extract metal compounds from metal ores.

**0 6 . 5** One method of producing copper from low-grade copper ores is by using bacteria.

The bacteria produce leachate solutions that contain copper compounds.

Give **two** methods that can be used to extract copper from these leachate solutions.

**[2 marks]**

1 \_\_\_\_\_

\_\_\_\_\_

2 \_\_\_\_\_

**Question 6 continues on the next page**

**Turn over ►**

Phytomining uses plants to absorb metal compounds from low-grade ores.

0 6 . 6

Describe how the metal compounds are obtained from the plants.

[3 marks]

---

---

---

---

---

---

---

0 6 . 7

Nickel is produced by phytomining.

One hectare of plants produces 215 kg of nickel.

Determine the area required to produce 750 kg of nickel.

Give your answer in  $\text{m}^2$ .

One hectare = 10 000  $\text{m}^2$

[3 marks]

---

---

---

---

---

---

---

Area required = \_\_\_\_\_  $\text{m}^2$
