

GCSE (9–1)

Combined Science A (Physics) A (Gateway Science)

J250/12: Paper 12 (Higher Tier)

General Certificate of Secondary Education

Mark Scheme for Autumn 2021

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

© OCR 2021

1. Annotations available in RM Assessor

Annotation	Meaning
	Correct response
	Incorrect response
	Omission mark
	Benefit of doubt given
	Contradiction
	Rounding error
	Error in number of significant figures
	Error carried forward
	Level 1
	Level 2
	Level 3
	Benefit of doubt not given
	Noted but no credit given
	Ignore

12. Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

Annotation	Meaning
/	alternative and acceptable answers for the same marking point
✓	Separates marking points
DO NOT ALLOW	Answers which are not worthy of credit
IGNORE	Statements which are irrelevant
ALLOW	Answers that can be accepted
()	Words which are not essential to gain credit
<u>—</u>	Underlined words must be present in answer to score a mark
ECF	Error carried forward
AW	Alternative wording
ORA	Or reverse argument

13. Subject-specific Marking Instructions

INTRODUCTION

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

The breakdown of Assessment Objectives for GCSE (9-1) in Combined Science A:

	Assessment Objective
AO1	Demonstrate knowledge and understanding of scientific ideas and scientific techniques and procedures.
AO1.1	Demonstrate knowledge and understanding of scientific ideas.
AO1.2	Demonstrate knowledge and understanding of scientific techniques and procedures.
AO2	Apply knowledge and understanding of scientific ideas and scientific enquiry, techniques and procedures.
AO2.1	Apply knowledge and understanding of scientific ideas.
AO2.2	Apply knowledge and understanding of scientific enquiry, techniques and procedures.
AO3	Analyse information and ideas to interpret and evaluate, make judgements and draw conclusions and develop and improve experimental procedures.
AO3.1	Analyse information and ideas to interpret and evaluate.
AO3.1a	Analyse information and ideas to interpret.
AO3.1b	Analyse information and ideas to evaluate.
AO3.2	Analyse information and ideas to make judgements and draw conclusions.
AO3.2a	Analyse information and ideas to make judgements.
AO3.2b	Analyse information and ideas to draw conclusions.
AO3.3	Analyse information and ideas to develop and improve experimental procedures.
AO3.3a	Analyse information and ideas to develop experimental procedures.
AO3.3b	Analyse information and ideas to improve experimental procedures.

Question	Answer	Marks	AO element	Guidance
1	A	1	2.1	
2	C	1	1.1	
3	A	1	1.1	
4	A	1	2.1	
5	B	1	1.2	
6	C	1	1.1	
7	A	1	2.1	
8	C	1	2.1	
9	C	1	1.1	
10	A	1	2.1	

Question			Answer	Marks	AO element	Guidance
11	(a)	(i)	Frequency or energy too high / too dangerous / gamma is ionising radiation / can cause cancer / AW ✓	1	1.2	ALLOW wavelength too small / can kill cells
		(ii)	Any one from: Microwaves ✓ Visible light ✓ Infra-red ✓ UV ✓	1	1.1	IGNORE X-rays / gamma rays / radio waves
		(iii)	Any one from: Radar ✓ Satellite (TV) ✓ Mobile phones ✓ Remote controls ✓ Optical fibres / optical wireless communications ✓ Morse code ✓ To see/to read CDs or DVDs ✓ Bluetooth ✓	1	1.1	IGNORE any use which does not involve communications / just 'TV'
	(b)	(i)	As frequency increases, wavelength decreases / ORA ✓ Any two pairs of values of frequency and wavelength that shows this relationship ✓	2	2x3.1a	Possible pairs: f (MHz) λ(m) 562 0.533 571 0.526 578 0.519 586 0.511 594 0.505 691 0.435
		(ii)	Three / 3 ✓	1	1.2	

Question			Answer	Marks	AO element	Guidance
	(b)	(iii)	FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 299 970 000 (m / s) award 3 marks 594 MHz = 594 000 000 Hz ✓ (Speed =) 594 000 000 × 0.505 ✓ (Speed =) 299 970 000 (m / s) ✓	3	1.2 2.1 2.1	ALLOW 300 000 000 or 3×10^8 (m / s) with workings shown ✓✓✓ ALLOW 2.9997×10^8 (m / s) ✓✓✓ ALLOW 299.97 (unit not changed) ✓✓
	(c)		FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 0.4 award 3 marks (efficiency =) useful E output ÷ input E ✓ (efficiency =) $100 \div 250$ ✓ (efficiency =) 0.4 ✓	3	1.2 2.1 2.1	ALLOW 40% ✓✓✓ ALLOW 0.4% or 0.4 with units or 40 ✓✓

Question	Answer	Marks	AO element	Guidance
12 *	Please refer to the marking instructions on page 4 of this mark scheme for guidance on how to mark this question. Level 3 (5–6 marks) Describes a detailed method of how to determine the reaction time. AND Suggests ways to improve the method to produce accurate and precise results. <i>There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated.</i> Level 2 (3–4 marks) Describes a method of how to determine the reaction time. AND Suggests a way to improve the method. <i>There is a line of reasoning presented with some structure. The information presented is relevant and supported by some evidence.</i> Level 1 (1–2 marks) Describes a basic method of how to determine the reaction time OR Suggests a way to improve the method. <i>There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant.</i> 0 marks <i>No response or no response worthy of credit.</i>	6	2 × 2.2 2 × 3.3a 2 × 3.3b	AO2.2 – Applies knowledge and understanding of how to determine the reaction time measurement. - Distance gives idea of reaction time - Use of $v^2 = u^2 + 2as$ ($a = 10 \text{ m/s}^2$) to calculate v and acceleration = $\Delta v / \Delta t$ or $t = \text{distance} / \text{average speed}$ to calculate reaction time t AO3.3b – Analyses information to develop a method to determine reaction time 1st person drops the ruler 2nd person catches it between fingers - Distance measured / time taken measured AO3.3b – Analyses information to improve the method - Repeat each measurement and take a mean - Discard anomalies - Ruler should be dropped without any warning - Vary the time before dropping the ruler - Ruler should be held level with fingers each time / distance should be corrected with height of ruler above hand - Use a ruler with a higher resolution - Ignore readings where there are random errors - Check that there are no systematic errors, e.g. zero errors

Question			Answer	Marks	AO element	Guidance												
13	(a)		Energy cannot be created/destroyed / AW ✓ Energy can only be transferred/changed/shifted (between stores) ✓	2	2 × 1.1													
	(b)		<table><tr><td></td><td>At the bottom of the ramp</td><td>At the top of the ramp</td></tr><tr><td>Magnetic energy store</td><td>MAXIMUM</td><td>MINIMUM</td></tr><tr><td>Gravitational energy store</td><td>MINIMUM</td><td>MAXIMUM</td></tr><tr><td>Thermal energy store</td><td>MINIMUM</td><td>MAXIMUM</td></tr></table>		At the bottom of the ramp	At the top of the ramp	Magnetic energy store	MAXIMUM	MINIMUM	Gravitational energy store	MINIMUM	MAXIMUM	Thermal energy store	MINIMUM	MAXIMUM	4	4 x 2.1	6 correct ✓✓✓✓ 4 or 5 correct ✓✓✓ 2 or 3 correct ✓✓ 1 correct ✓
	At the bottom of the ramp	At the top of the ramp																
Magnetic energy store	MAXIMUM	MINIMUM																
Gravitational energy store	MINIMUM	MAXIMUM																
Thermal energy store	MINIMUM	MAXIMUM																
	(c)	(i)	FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 4 (m / s) award 3 marks Rearranges: $v^2 = KE / (0.5 \times m)$ ✓ $v^2 = 0.024 / (0.5 \times 0.003)$ or $v^2 = 16$ ✓ $v = 4$ (m / s) ✓	3	1.2 2.1 2.1	ALLOW $v = \sqrt{2KE/m}$ ✓ ALLOW $v = \sqrt{(2 \times 0.024)/0.003}$ ✓												
		(ii)	Any two from: Kinetic energy (store) decreases ✓ Energy would be transferred to a thermal store ✓ (Transferred/dissipated) into the surroundings / ground / air ✓	2	2x1.2													

Question			Answer	Marks	AO element	Guidance
14	(a)		Change in mass of nucleus: -4 ✓ Change in charge on nucleus: $+1$ ✓	2	2×1.2	ALLOW decreases by 4 ALLOW increases by 1
	(b)		Radioactive decay is a random process / AW ✓	1	1.1	ALLOW answers referring to background radiation
	(c)		FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 9 (days) award 2 marks (Ratio of 1:4 implies) 2 half-lives ✓ (2 half lives = 18 so half-life =) 9 (days) ✓	2	2×2.1	
	(d)		(Isotope X or beta) Beta radiation penetrates paper / ORA ✓ Beta radiation is blocked by aluminium / AW ✓	2	2×2.2	No marks can be scored if isotope Y or alpha identified
	(e)		(Y is irradiated because) Y is exposed to the radiation from X / radiation from X reaches Y / AW ✓ (Not contaminated because) X does not touch Y / there is not a radioactive source touching Y / AW ✓	2	$2 \times 3.2b$	
	(f)		Any two from: It is reliable / non-renewables are unreliable ✓ Accidents are rare / still a safe resource ✓ Renewables do not produce enough energy / nuclear power produces more energy for less fuel / AW ✓ There is a plentiful supply of nuclear fuel / nuclear fuel is sustainable ✓ To meet the demand of consumers ✓ No greenhouse gases / no CO ₂ produced ✓	2	$2 \times 3.1b$	

Question			Answer	Marks	AO element	Guidance
15	(a)		Gravitational (store decreases/empties) ✓ Kinetic (store increases/fills) OR thermal (store increases/fills) ✓	2	2 × 1.1	
	(b)		FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 0.25 (Hz) award 2 marks (Idea that) frequency = number of waves per second ✓ (5 drops in 20s = 5/20 per second =) 0.25 (Hz) ✓	2	1.2 2.1	
	(c)		(Idea that) the water does not move to the side of the bowl / water is left in the bowl / AW ✓	1	1.1	ALLOW water (only) moves up and down / a small object/piece of cork (only) moves up and down
	(d)	(i)	FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 4×10^{-8} (°C) award 3 marks (temperature rise =) $E \div (m \times c)$ ✓ (temperature rise =) $5.04 \times 10^{-4} \div (3 \times 4200)$ ✓ (temperature rise =) 4×10^{-8} (°C) ✓	3	1.2 2 × 2.1	
		(ii)	Any two from: Temperature rise very small ✓ Requires precise or high resolution thermometer ✓ (idea that) Joule's equipment may not have been precise or good enough ✓ The water "sprays" out so it is difficult to measure accurately / AW ✓	2	2 × 3.2a	ALLOW he only has a simple/normal thermometer
