

**General Certificate of Secondary Education
2023**

**Double Award Science
Biology**

Unit B2

Foundation Tier

[GDW41]

FRIDAY 9 JUNE, AFTERNOON

**MARK
SCHEME**

General Marking Instructions

Introduction

Mark schemes are intended to ensure that the GCSE examinations are marked consistently and fairly. The mark schemes provide markers with an indication of the nature and range of candidates' responses likely to be worthy of credit. They also set out the criteria which they should apply in allocating marks to candidates' responses.

Assessment objectives

Below are the assessment objectives for GCSE Double Award Science.

Candidates must:

- AO1** Demonstrate knowledge and understanding of:
- scientific ideas; and
 - scientific techniques and procedures;
- AO2** Apply knowledge and understanding of and develop skills in:
- scientific ideas; and
 - scientific enquiry, techniques and procedures; and
- AO3** Analyse scientific information and ideas to:
- interpret and evaluate;
 - make judgements and draw conclusions; and
 - develop and improve experimental procedures.

Quality of candidates' responses

In marking the examination papers, examiners should be looking for a quality of response reflecting the level of maturity which may reasonably be expected of a 16-year-old which is the age at which the majority of candidates sit their GCSE examinations.

Flexibility in marking

Mark schemes are not intended to be totally prescriptive. No mark scheme can cover all the responses which candidates may produce. In the event of unanticipated answers, examiners are expected to use their professional judgement to assess the validity of answers. If an answer is particularly problematic, then examiners should seek the guidance of the Supervising Examiner.

Positive marking

Examiners are encouraged to be positive in their marking, giving appropriate credit for what candidates know, understand and can do rather than penalising candidates for errors or omissions. The exception to this for GCSE Double Award Science is when examiners are marking complex calculations when the Examiners are briefed to mark by error or omission. Examiners should make use of the whole of the available mark range for any particular question and be prepared to award full marks for a response which is as good as might reasonably be expected of a 16-year-old GCSE candidate.

Awarding zero marks

Marks should only be awarded for valid responses and no marks should be awarded for an answer which is completely incorrect or inappropriate.

Marking Calculations

In marking answers involving calculations, examiners should apply the 'carry error through' rule so that candidates are not penalised more than once for a computational error. To avoid a candidate being penalised, marks can be awarded where correct conclusions or inferences are made from their incorrect calculations.

Types of mark schemes

Mark schemes for tasks or questions which require candidates to respond in extended written form are marked on the basis of levels of response which take account of the quality of written communication.

Other questions which require only short answers are marked on a point for point basis with marks awarded for each valid piece of information provided.

Levels of response

In deciding which level of response to award, examiners should look for the number of indicative content points in candidate responses to ensure that the answer has been written to coincide with the question. In deciding which mark within a particular level to award to any response, quality of communication will be assessed and examiners are expected to use their professional judgement.

The following guidance is provided to assist examiners.

- **Threshold performance:** Response which just merits inclusion in the level and should be awarded a mark at or near the bottom of the range.
- **High performance:** Response which fully satisfies the level description and should be awarded a mark at or near the top of the range.

Quality of written communication

Quality of written communication is taken into account in assessing candidates' responses to all tasks and questions that require them to respond in extended written form. These tasks and questions are marked on the basis of bands of response. The description for each band of response includes reference to the quality of written communication.

For conciseness, quality of written communication is distinguished within bands of response as follows:

- Band A: Quality of written communication is excellent.
Band B: Quality of written communication is good.
Band C: Quality of written communication is basic.
Band D: Response not worthy of credit.

In interpreting these band descriptions, examiners should refer to the more detailed guidance provided below:

Band A (Excellent): Excellent reference to scientific terminology. The candidate successfully selects and uses the most appropriate form and style of writing. Relevant material is organised with a high degree of clarity and coherence. There is widespread and accurate use of appropriate specialist vocabulary. Presentation, spelling, punctuation and grammar are of a sufficiently high standard to make meaning clear.

Band B (Good): Good reference to scientific terminology. The candidate makes a reasonable selection and use of an appropriate form and style of writing. Relevant material is organised with some clarity and coherence. There is some use of appropriate specialist vocabulary. Presentation, spelling, punctuation and grammar are sufficiently competent to make meaning clear.

Band C (Basic): Basic reference to scientific terminology. The candidate makes only a limited selection and use of an appropriate form and style of writing. The organisation of material may lack clarity and coherence. There is little use of specialist vocabulary. Presentation, spelling, punctuation and grammar may be such that intended meaning is not clear.

1	(a)	Disease	Method of spread	AVAILABLE MARKS
		chlamydia	through food	
		tuberculosis	through sexual intercourse	
		salmonella	through droplets in the air	
		cold	through droplets in the air	
		[1] mark each	[4]	
	(b)	antibiotic;	[1]	
	(c) (i)	bacteria/fungi/mould;	[1]	
	(ii)	aseptic (technique);	[1]	7
2	(a)	clotting/convert fibrinogen to fibrin/scab formation/forms fibrin;	[1]	
	(b)	Any two from: amino acids; fatty acids; glycerol; vitamins/named vitamin; minerals/named mineral; hormones/named hormone; urea; carbon dioxide;	[2]	
	(c) (i)	Any two from: nucleus present; larger; round/spherical/they are not biconcave shape; no haemoglobin; (Allow converse for red blood cells if explicit)	[2]	
	(ii)	5; $5 \times 650 = 3250$;	[2]	
	(iii)	(sample from a person who) has an infection/disease/inflammation/ named disease/name infection/injury/is sick/bacteria present/is anaemic	[1]	8

			AVAILABLE MARKS									
3	(a) (i)	double helix;	[1]									
	(ii)	nucleus/chromosomes/genes;	[1]									
	(b)	24 written in nucleus of egg cell (at top of diagram); 47 written in nucleus of fertilised egg (at bottom of diagram);	[2]									
	(c)	use of needle or syringe; (to extract) fluid or liquid; baby cell(s) present in fluid/care of position where needle inserted/amniotic named as fluid/from amniotic sac;	[3]									
	(d) (i)	inherited;	[1]									
	(ii)	Huntington's disease;	[1]	9								
4	(a)	RR; and Rr; [1] mark each either order	[2]									
	(b)	<table><tr><td></td><td>R</td><td>R</td></tr><tr><td>r</td><td>Rr</td><td>Rr</td></tr><tr><td>r</td><td>Rr</td><td>Rr</td></tr></table> <p>[1] mark Punnett; [1] mark for parent rr; [1] mark for parent RR; [1] mark for correct cross;</p>			R	R	r	Rr	Rr	r	Rr	Rr
	R	R										
r	Rr	Rr										
r	Rr	Rr										

5

Statement	true for mitosis only	true for meiosis only	true for both mitosis and meiosis
produces two daughter cells	✓		
produces haploid cells		✓	
is a type of cell division			✓
produces sperm cells		✓	
is a reduction division		✓	
produces genetically identical cells	✓		

[1] for each correct answer with only one tick in each row

[6]

6

6 (a) once a month; [1]

(b) (i) A; [1]

(ii) B; [1]

(c) (i) X on at least one oviduct; [1]

(ii) stops sperm reaching egg/prevents sperm passing through the oviducts; [1]

(iii) permanent/not easily reversed; [1]

(d) contains hormones/contains a female hormone (named female hormone)/
 changes hormone levels/controls hormone levels;
 (do not allow testosterone/do not allow insulin)
 stops egg/ovum production/no egg/ovum present or produced/prevents
 ovulation/stops eggs maturing/stops uterus lining thickening/thickens cervical
 mucus; [2]

8

7 (a)

Statement	True	False	Can't tell
The amount of chemical X in the saliva of children who have a childminder who smokes is the same as in children who are looked after by a childminder who does not smoke.		✓	
The amount of chemical X in the saliva of children where neither parent smokes is the lowest amount for any group.	✓		
The amount of chemical X in the saliva of children who have only a father who smokes is lower than the amount in children who have only a mother who smokes.	✓		
The amount of chemical X in the saliva of children aged between 4 and 7 is exactly the same as the amount in children aged between 8 and 11.			✓
The amount of chemical X in the saliva of children where both parents smoke is equal to the figure for the amounts where only the father smokes and the figure for only the mother smokes added together .	✓		

[1] for each correct allow only one tick in each row

[5]

(b) nicotine is addictive/have been a passive smoker/smoking as learned behaviour;

[1]

(c) less exposure/less exposure described;
to smoke/fumes/nicotine;
parents or childminders may have given up smoking following the ban/
parents or childminders may smoke less inside the home following the
ban/less nicotine in their blood;

[3]

AVAILABLE
MARKS

9

8 Indicative content

1. recognise/detect/presence of foreign microorganism/foreign protein/foreign antigen/structure Z is the antigen;
2. white blood cells produce antibodies
3. lymphocytes produce antibodies
4. antibodies complementary (described) to antigen
5. clump produced/clumping
6. clumping described
7. C is the antibody

Must have antibody C to get into the top band

Band	Response	Mark
A	Candidates use appropriate terms throughout to give at least five points from the indicative content. They use good spelling, punctuation and grammar skills. Form and style are of a high standard.	[5]–[6]
B	Candidates use appropriate terms throughout to give at least three or four points from the indicative content. They use satisfactory spelling, punctuation and grammar. Form and style are of a satisfactory standard.	[3]–[4]
C	Candidates use appropriate terms throughout to give one or two points from the indicative content. They use limited spelling, punctuation and grammar and have made little use of specialist terms.	[1]–[2]
D	Response not worthy of credit.	[0]
