Question number	Answer	Notes	Marks
1 (a) (i)	1. measure mass / measure weight / measure water loss; 2. in one minute / in an hour / per minute / per hour / per day / after a period of time / eq;	 2. gnore before and after / at the end of the experiment	2
(II)	1. no plant; 2. oil layer and water present; 3. balance present;	ignore twig with no leaves ignore number on balance labels not needed	3

<table>
<tr>
<td>(b)</td>
<td>
<table>
<tr><th>change of condition</th><th>Change in transpiration rate</th><th>Explanation</th></tr>
<tr><td>warmer air</td><td>increase;</td><td>more (kinetic) energy / more evaporation / molecules move faster /eq;</td></tr>
<tr><td>put in the dark decrease</td><td>put in the dark decrease</td><td>stomata close;</td></tr>
<tr><td>increased wind increase</td><td>increased wind</td><td>increased concentration gradient / moves molecules away / blows water away / eq;</td></tr>
<tr><td>increased humidity</td><td>decrease;</td><td>decreased concentration gradient</td></tr>
</table>
</td>
<td></td>
<td>5</td>
</tr>
<tr>
<td>(c)</td>
<td>1. supply mineral ions / supply named mineral ion;

2. support / turgidity / prevent wilting / eq;

3. cooling / prevent overheating;

4. water for photosynthesis;</td>
<td>1. gnore nutrients

3. ig re homeostasis idea

ignore growth</td>
<td>2</td>
</tr>
</table>

Total 12 marks

Question number	Answer	Notes	Marks
2 (a)	1. not full / less water / flaccid / shrink / eq; 2. _ytoplasm does not fill cell / cytoplasm away (from cell wall) / membrane away from cell wall / membrane irregular shape / contents away (from cell wall) / eq; 3. p smolysed / plasmolysis; 4. darker colour / q;	Allow converse	2 max
(b)	1. ovement of) water; 2. dilut to concentrated / weak solution to a strong solution / down water potential gradient / high conc of water to low conc of water / eq; 3. lectively permeable membrane / eq;	Movement of water from a high conc to a low conc = 2, but water down a concentration gradient = 1 Membrane alone = 0	2 max

(c)	1. water aves cell / eq; 2. highe concentration outside cell / dilute to concentrated / weak solution to a strong solution / down water potential gradient / high conc of <u>water</u> to low conc of <u>water</u> / eq; eq; 3. ll <u>membrane</u> shrinks from cell wall / cell dehydrates / plasmolysis / flaccid / eq;		max 3
(d) (i) (ii)	1. cells burst / eq; 2. wat enters cells; 3. n cell wall / eq; 1. enated / buckled / shrink / smaller / flaccid / eq; 2. wat leaves cells;	Ignore bigger idea Ignore dehydrated	2 max 2
