Pearson Edexcel Level 3 GCE

Wednesday 17 May 2023

Morning (Time: 2 hours 15 minutes)

Paper reference **9GE0/01**

Geography
Advanced
PAPER 1

You must have:
 Resource Booklet (enclosed)
 Calculator, ruler

Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions in Section **A**, and Section **C**.
- Answer **either** Question 2 **or** Question 3 in Section **B**.
- Answer the questions in the spaces provided
 – *there may be more space than you need.*

Information

- The total mark for this paper is 105.
- The marks for **each** question are shown in brackets
 – *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

SECTION A

Tectonic Processes and Hazards

Answer ALL questions in this section. Write your answers in the spaces provided.

You must use the Resource Booklet provided.

1 Study Figure 1 below.

The data was collected to investigate whether there was a significant relationship between the population living within 5km of a volcanic location and the years since the last eruption, at 10 selected locations.

Volcanic location	Population within 5km, in millions	Rank	Years since last eruption	Rank	d	d ²
Michoacán-Guanajuato	5.8	1	70	8	-7	49
Tatun Volcanic Group	5.1	2	1374	1	1	1
Campi Flegrei	2.2	3	484	4	-1	1
Ilopango	2.0	4	142	5	-1	1
Hainan Volcanic Field	1.7	5	89	7	-2	4
San Pablo Volcanic Field	1.3	6.5	672	2	4.5	20.25
Ghegham Volcanic Ridge	1.3	6.5	122	6	0.5	0.25
Dieng Volcanic Complex	1.1	8	1	9.5	-1.5	2.25
Auckland Volcanic Field	1.0	9.5	576	3	6.5	42.25
Masaya	1.0	9.5	1	9.5	0	0
						Σd^2

Figure 1

The population living within 5km of a volcanic location and the years since the last eruption, at 10 selected locations.

- (a) (i) Calculate Σd^2 .

(1)

$$\Sigma d^2 = \dots\dots\dots$$

- (ii) The formula for Spearman's rank correlation coefficient value r_s is given below.

In this data set $n = 10$.

$$r_s = 1 - \frac{6 \Sigma d^2}{n^3 - n}$$

Calculate the value of r_s , to two decimal places, for the data given.

You must show your working.

(2)

$$r_s = \dots\dots\dots$$

- (iii) The tables below show the two hypotheses that are being tested and the critical values of Spearman's rank r_s when $n = 10$.

Null Hypothesis: There is no significant relationship between the number of people living within 5km of a volcanic location and the years since the last eruption.

Alternative Hypothesis: There is a significant relationship between the number of people living within 5km of a volcanic location and the years since the last eruption.

Confidence level	0.10 (90%)	0.05 (95%)	0.01 (99%)
Critical value	0.44	0.56	0.73

Using the Spearman's rank correlation r_s value calculated in (a)(ii), state which hypothesis can be accepted.

(Total for Question 1 = 16 marks)

TOTAL FOR SECTION A = 16 MARKS

SECTION B

Landscape Systems, Processes and Change

Answer ONE question in this section – either Question 2 OR Question 3.

Indicate which question you are answering by marking a cross in the box ☐. If you change your mind, put a line through the box ☐ and then indicate your new question with a cross ☐.

If you answer Question 2, put a cross in the box ☐.

Glaciated Landscapes and Change

You must use the Resource Booklet provided.

2 Study Figure 2a in the Resource Booklet.

(a) Explain the contribution of meltwater to the movement of temperate glaciers.

(Total for Question 2 = 40 marks)

Do not answer Question 3 if you have answered Question 2.

Indicate which question you are answering by marking a cross in the box ☐. If you change your mind, put a line through the box ☒ and then indicate your new question with a cross ☐.

If you answer Question 3, put a cross in the box ☐.

Coastal Landscapes and Change

You must use the Resource Booklet provided.

3 Study Figure 3a in the Resource Booklet.

(a) Explain the contribution of erosional processes in producing sediment.
