Paper 6 Probability & Statistics 2

May/June 2024**1 hour 15 minutes**

You must answer on the question paper.

You will need: List of formulae (MF19)

INSTRUCTIONS

- Answer **all** questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do **not** write on any bar codes.
- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

INFORMATION

- The total mark for this paper is 50.
- The number of marks for each question or part question is shown in brackets [].

This document has **12** pages.

1 The random variable X has the distribution $B(4000, 0.001)$.

(a) Use a suitable approximating distribution to find $P(2 \leq X < 5)$.

[3]

This image shows a full page of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page, providing a template for handwriting practice or general writing. There are no margins, text, or other markings on the page.

(b) Justify your approximating distribution in this case.

[1]

.....

.....

.....

- (a) Calculate an estimate of the population standard deviation. [3]

This image shows a full page of white paper with horizontal dashed lines, typical of primary-ruled notebook paper. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

[illegible]

4 In this question you should **not** use an approximating distribution.

At an election in Menham last year, 24% of voters supported the Today Party. A student wishes to test whether support for the Today Party has decreased since last year. He chooses a random sample of 25 voters in Menham and finds that exactly 2 of them say that they support the Today Party.

Test at the 5% significance level whether support for the Today Party has decreased. [5]

[illegible]

5 A random variable X has probability density function f given by

$$f(x) = \begin{cases} ax - x^3 & 0 \leq x \leq \sqrt{2}, \\ 0 & \text{otherwise,} \end{cases}$$

where a is a constant.

(a) Show that $a = 2$. [3]

[illegible]

(b) Find the median of X . [4]

[illegible]

[1]

This image shows a single page of white paper designed for handwriting practice or simple writing. It features ten evenly spaced, horizontal dashed lines running across the width of the page. The lines are thin and black, providing a guide for letter height and placement. There is no other text, imagery, or markings on the page.

7 The independent random variables X and Y have the distributions $Po(1.9)$ and $Po(2.2)$ respectively.

(a) Find $P(X + Y < 4)$. [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

(b) Find the probability that $X = 2$ given that $X + Y < 4$. [4]
