Pearson Edexcel International Advanced Level

Thursday 11 May 2023

Morning (Time: 1 hour 30 minutes)

Paper reference **WST01/01**

Mathematics

International Advanced Subsidiary/Advanced Level

Statistics S1

You must have:
Mathematical Formulae and Statistical Tables (Yellow), calculator

Total Marks

Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure your that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Values from the statistical tables should be quoted in full. If a calculator is used instead of the tables, the value should be given to an equivalent degree of accuracy.
- Inexact answers should be given to three significant figures unless otherwise stated.

Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 7 questions in this question paper. The total mark for this paper is 75.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.

Pearson

1. The histogram shows the distances, in km, that 274 people travel to work.

Given that 60 of these people travel between 10 km and 20 km to work, estimate

- (a) the number of people who travel between 22 km and 45 km to work, (3)
- (b) the median distance travelled to work by these 274 people, (2)
- (c) the mean distance travelled to work by these 274 people. (3)

Question 1 continued

Handwriting practice area with horizontal lines.

(Total for Question 1 is 8 marks)

2. Two students, Olive and Shan, collect data on the weight, w grams, and the tail length, t cm, of 15 mice.

Olive summarised the data as follows

$$S_{tt} = 5.3173 \quad \sum w^2 = 6089.12 \quad \sum tw = 2304.53 \quad \sum w = 297.8 \quad \sum t = 114.8$$

- (a) Calculate the value of S_{tw} and the value of S_{ww} . (3)

- (b) Calculate the value of the product moment correlation coefficient between w and t . (2)

- (c) Show that the equation of the regression line of w on t can be written as

$$w = -16.7 + 4.77t \quad (3)$$

- (d) Give an interpretation of the gradient of the regression line. (1)

- (e) Explain why it would not be appropriate to use the regression line in part (c) to estimate the weight of a mouse with a tail length of 2 cm. (2)

Shan decided to code the data using $x = t - 6$ and $y = \frac{w}{2} - 5$

- (f) Write down the value of the product moment correlation coefficient between x and y . (1)

- (g) Write down an equation of the regression line of y on x .
You do not need to simplify your equation. (1)

Question 4 continued

(Total for Question 4 is 9 marks)

- 5.** A discrete random variable Y has probability function

$$P(Y = y) = \begin{cases} k(3 - y) & y = 1, 2 \\ k(y^2 - 8) & y = 3, 4, 5 \\ k & y = 6 \\ 0 & \text{otherwise} \end{cases}$$

where k is a constant.

- (a) Show that $k = \frac{1}{30}$ (2)

Find the exact value of

- $$(b) \ P(1 < Y \leq 4) \tag{2}$$

- $$(c) \ E(Y) \tag{2}$$

The random variable $X = 15 - 2Y$

- (d) Calculate $P(Y \geq X)$
- (3)**

- (e) Calculate $\text{Var}(X)$ **(4)**

Question 5 continued

Handwriting practice area with horizontal lines.

(Total for Question 5 is 13 marks)

6. Three events A , B and C are such that

$$P(A) = 0.1$$

$$P(B|A) = 0.3$$

$$P(A \cup B) = 0.25$$

$$P(C) = 0.5$$

Given that A and C are mutually exclusive

(a) find $P(A \cup C)$

(1)

(b) Show that $P(B) = 0.18$

(3)

Given also that B and C are independent,

(c) draw a Venn diagram to represent the events A , B and C and the probabilities associated with each region.
